1) Appeal Brief filed 10/14/03 has been entered. Upon reconsideration, claims 10-17, 20-28, 31-40 and 46-62 are considered definite.

2) An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with W. S. Harders on 2/19/04.

The claims have been amended as follows:

In claim 10, penultimate line, changed "an indicator" to --the indicator--.

This change to claim 10 ties the result, in the concluding step, to what is recited in the preamble.

3) Examiner's comments: In claims 10, 20, 31, 46 and 54, part (a) of each, the term "an anti-human antibody" is understood to refer to an antibody that binds to human antibodies, the latter of which may be present in sialocomplexes in the sample.

4) The art made of record and not relied upon is considered pertinent to applicant's disclosure. Robichaud et al (6,599,756) and Latov et al (2003/0049692) disclose assays which determine a patient's antibody response against various gangliosides/glycosphingolipids. There is no disclosure of determining immune complexes containing gangliosides/glycosphingolipids and a patient's antibody thereto. Albitar et al (2003/0068664) disclose assays which determine the presence of immune complexes containing a siglec (CD33) and an administered therapeutic antibody thereto.
